

Male Libido

Especially formulated for men, the herbs in **Male Libido** work synergistically to help support energy resources and balance. They are adaptogenic tonics in nature; they oxygenate and increase blood flow; and most are well known, traditional libido enhancers. Also providing vitamins and minerals, they support prostate functioning.

Ingredients:

American ginseng Provides circulatory and immune support. A stress reducer, hypertension balancer, liver protector, an anti-inflammatory, improves memory, and is well known for vitalizing blood flow. Recognized worldwide as a premier adaptogen for enhancing mental and physical well-being.

Milky oat straw Its high silica content strengthens the entire nervous system, providing steadiness and calm.

Siberian eleuthero A classic adaptogen, enhancing energy reserves and helping in recovery from both physical and emotional stress, providing adrenal support. Good for endurance, mood, productivity, and virility.

Sarsaparilla A tropical root good for metabolic and endocrine support, known to enhance testosterone levels.

Saw palmetto Clinical trials have shown its benefits for nourishing and supporting prostate functioning.

Tribulus terrestris It is a libido enhancer, reputed to restore and increase testosterone levels and sex drive.

Tienchi (notoginseng) It has the ability to increase coronary blood flow, thereby overall circulation.

Muara puama A strong energy and libido tonic, called “potency wood,” traditionally used for impotence.

Catuaba Traditional use in Brazil for its aphrodisiac property. Provides nervous system support and recovery.

TongKat Ali A traditional libido booster from Southeast Asia, enhancing performance, virility, strength.

Damiana Widely used in Mexico as an aphrodisiac, increasing energy and restoring libido.

Hawaiian ginger Used in the formula as a catalyst and carrier, clearing the circulation and moving blood.
